Description:

DIP-CIBs are low profile, thermally efficient, transfer mold modules. Each module consists of a three-phase diode converter section, a three-phase inverter section and a brake circuit. Open emitters allow the designer to sense the current in each phase leg for accurate and low cost current sensing. A thermistor is included in the package for sensing the base-plate temperature. 5th Generation CSTBT chips yield low loss. The module is completely Pb-Free and hence RoHS compliant.

Features:

- ☐ Compact Package
- ☐ Only 5.7mm Thick
- ☐ One Package for Entire Family
- ☐ Thermistor
- ☐ Open Emitters

Applications:

- ☐ AC Motor Control
- ☐ Servo Motors
- ☐ Robotics
- ☐ HVAC Inverters

Ordering Information:
